Letter of Recommendation for Dheeraj PARKASH

I am pleased to recommend Dheeraj PARKASH, who completed an internship under my supervision in the field of data analysis and multimodal artificial intelligence within the Innovation Department at Alten. During this period, he demonstrated scientific rigor, strong autonomy, and a genuine enthusiasm for applied research.

His work mainly focused on data fusion from heterogeneous sources (textual, visual, and numerical) with the objective of improving behavioral analysis performance in immersive environments. He quickly assimilated complex concepts such as multimodal learning and data representation, and successfully implemented them in practice, combining a rigorous modeling approach with a pragmatic sense of experimentation.

I am confident that Dheeraj will thrive in any research or engineering environment related to artificial intelligence. He possesses the ideal profile to pursue a PhD or to take on a data science position with high responsibility, combining strong technical skills, a sense of innovation, and scientific reasoning.

I therefore wholeheartedly recommend him for any doctoral program or position related to data analysis, data science, or multimodal AI.

Please do not hesitate to contact me should you require any additional information.

Kind regards,

Zineb NOUMIR
